PROFESSIONAL SUMMARY

Full-Stack Software Engineer and Computer Science graduate (Software Engineering, Excellent/A+) who recently designed, built, tested, and deployed a complete AI-powered web platform end-to-end. Proficient in JavaScript, Node.js, and Python, with hands-on software testing (manual, API, and database) based on ISTQB methodologies and a strong foundation in data structures, algorithms, and OOP. Brings a unique system-level perspective from award-winning hardware/software integration projects.

PROJECTS

SERVIO — AI-Powered Home Services Platform

Graduation Project — Grade: Excellent

Full-Stack Web Developer · Team of 5 · Tech: JavaScript (ES Modules), Node.js, Express, MongoDB, REST APIs, Stripe, Git

- Independently owned the entire web application end-to-end — planning, development, testing, and deployment — while a 4-member team delivered the companion Flutter mobile app.
- Built a responsive **vanilla-JavaScript frontend** (modular ES-module components) consuming the platform's **REST APIs**, plus backend services in **Node.js/Express/MongoDB** for JWT auth, bookings, Stripe payments (refunds & disputes), real-time messaging, and admin.
- Integrated **AI features** — smart technician matching and an AI “room-finisher” that generates room renders from uploaded images — through Python/FastAPI microservices.
- Delivered a **bilingual (EN/AR) UI with RTL** and light/dark theming, applied **ISTQB-based manual, API, and database testing** across auth/booking/payment flows, and deployed the backend to **Render**.

Fingerprint Attendance System

January 2023

- Developed a complete fingerprint-based attendance system by designing the hardware and creating custom software to process data and improve administrative efficiency.
- Awarded “**Best Project**” during college evaluations for its innovation and impact.

Fully Autonomous Cotton Candy Robot

April 2019

- Led the electronic design for a fully autonomous robot, implementing all circuits, sensors, and control systems to ensure smooth operation.
- Recognized with two major awards: “**Best Project**” at the **National Maker Faire** and a “**Top 10**” placement at the **International Maker Faire in New York**.

EDUCATION

B.Sc. in Computer Science – Software Engineering

September 2022 – September 2026

Arab Academy for Science & Technology (AAST), Cairo

Final Grade: Excellent (A+)

TRAINING

Software Testing Diploma | Machinify Academy

July 2025 – November 2025

- Mastered foundational principles based on ISTQB and ISTQB Agile methodologies.
- Acquired practical skills in Manual, API, and Database testing techniques.
- Gained a comprehensive understanding of the fundamentals of Automation Testing.

UI/UX Design Training | National Telecommunication Institute

August 2025 – September 2025

- Mastered UI/UX fundamentals, including user research, wireframing, information architecture & usability testing.
- Developed proficiency in creating high-fidelity designs and interactive prototypes using Figma.
- Applied skills to hands-on projects, including a mobile application interface and a website landing page.

WORK EXPERIENCE

Front Desk Representative

June 2024 – December 2024

Air Gym, Cairo

- Advised members on suitable fitness plans, personal training, and wellness packages.
- Developed strong member relationships to improve satisfaction and client loyalty.
- Earned the “**Best Performance**” award for two consecutive months for top sales and service.

Instructor — PCB Designing and Fabrication

March 2020 – December 2021

Big Hero Academy, Cairo

- Taught and mentored students in the design and fabrication of Printed Circuit Boards (PCBs).
- Delivered hands-on training covering PCB design software, fabrication techniques, and assembly processes.
- Developed course material and exercises to enhance students' practical understanding of PCB manufacturing.

SKILLS

Languages: Java, C++, Python, JavaScript, SQL, HTML/CSS

Web & Backend: Node.js, Express, MongoDB, REST APIs

Testing: Manual, API, Database & Automation Testing (ISTQB)

Design & Tools: Figma (UI/UX), PCB Design, Git, Microsoft Office

Professional: Problem-Solving, Communication, Collaboration, Analytical Thinking, Agile / SDLC
